

PRESS RELEASE

ISO9001 award for optical wireless technology leader

Company with most advanced optical wireless solutions for ISPs, wireless operators and corporate enterprise networks, achieves ISO9001 accreditation

Surrey, 30 February 2001 – Leading laser/IR optical wireless specialist Cablefree Solutions has been awarded ISO9001 accreditation in recognition of its leading-edge production capabilities and product quality assurance.

Cablefree's manufacturing facility at Hampton Hill near London, UK, incorporates all production aspects to Cablefree's family of optical wireless laser solutions, from CAD/CAM design and product development, to test and measurement, calibration, final assembly and quality control. In line with massive demand for the company's systems, Cablefree Solutions is currently undergoing a major expansion at the Hampton Hill site.

The award also coincides with a major distribution alliance to address the African wireless telecoms and networking/ISP markets, through the establishment of Cablefree Africa. More than 50 laser installations are currently active or being installed.

"Achieving ISO9001 recognises our processes and quality assurance in the manufacture of optical laser solutions, so that all our existing customers and future clients can be assured of receiving and installing the best quality and most reliable products available in this sector," said Cablefree Solutions Director, Penny Lee.
